THE ART WITHIN

‘Connexió Tèxtil’ by Lorena Canals

‘CONNEXIÓ TÈXTIL’

Lorena Canals, 2026

At the entrance of the conference ballroom at Hotel Arts Barcelona, a large-scale textile installation by Lorena Canals unfolds as a dialogue between craftsmanship and architecture.

Composed of eighteen handwoven vertical pieces, each three metres high, the work is produced on traditional looms by artisans in India. Positioned alongside a mirrored wall, the textiles interact with their reflection, creating depth, rhythm and a continuous visual flow.

Inspired by architectural columns, the vertical composition is enriched by a palette drawn from Barcelona; terracotta, deep blues, sandy tones, natural greens and warm yellows. A subtle reference to Antoni Gaudí’s trencadís emerges through blocks of colour that form a contemporary woven mosaic.

Through texture, colour and form, the installation elevates textile into a contemporary architectural statement, celebrating the creative spirit of the city.
